

THE LETTERS THAT KEEP US GOING

Dear Mr McKie,

SCRO

I read with incredulity the letter published in "The Herald" by Kay Ryall and anticipated a response to her comments. At the time of Shirley's original hearing and the published evidence I wrote to the Police Authority and got a reply that would have confused a Bush/Blair spin doctor.

A school pal of mine who now lectures on fingerprint technology agreed with other experts that Glasgow got it wrong.

Your fight to clear Shirley's injustice is an honourable one and I hope that with all those who are assisting you with the case justice will prevail. Too often now the innocent are denied access to the means of equality. When I recall that the got legal aid as did the only human living human who has recovered from Alzheimer's disease....., I think something is rotten in our justice system.

The Establishment is doing the same to Rose Gentle, the mother who is seeking an apology from Tony Blair and the MOD for the death of her bairn in Iraq. No legal aid for her and the MOD has lined up a division of legal experts to save the reputation of MP's and others at no cost to themselves. Understanding the mountain of money required to take on your old employers must be a daunting task.

Ordinary guid folks should never be put in such a pernicious predicament as this only illustrates that there is no equality in the judicial system. I will not be alone in giving your family all the moral support you will need. We will hope for a just conclusion to your fight.

Yours sincerely,

GS Scotland

.....

P.S. Isn't it amazing yow many executive members of Trade Unions, COSLA and Chief Constables get honours from HM on recommendations from the establishment?? I wonder why??

Dear Iain and Shirley

All the best to you both. The fact that you still have the energy to take the knocks and carry on is really amazing, albeit I suspect that it must be very draining. Keep plugging away! Cheers.

PD Scotland.
